

# Internet and free access for Deaf users

# Perspectives of collaboration, accessibility, and multi-modal communication

#### Information access

### **Inclusive Communication**

- Policy agreed by all stakeholders
- Freedom of speech in open society
- Perceivable information for all users
- Accessible information seeking and barrier-free communication
- Benefits from the use of digital technology

## Different output and input modalities

- Multi modality (pictorial, verbal, tactile) for presentation of information
- Technology should be developed in collaboration with the users
  - Deaf: Sign Language
  - Blind: Speech, Braille etc.
- Active citizens vs. passive consumers

#### **Effective ICT**

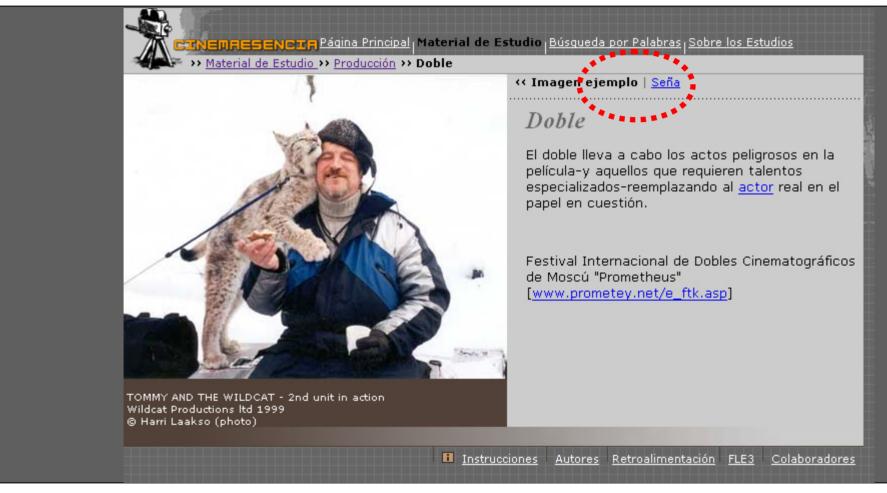

#### For

- Distance interpreter services
- Learning
- Working
- Social life

#### Free access of Deaf

#### Free access of Deaf

### **Enabling environments**

- Regardless of ambient conditions or the user's sensory abilities like
  - Deafness
  - Blindness
- Barrier-free communication and collaboration between
  - Deaf individuals
  - Deaf and hearing communities
- ICT for free communication

Szépen köszönöm Dékujeme Vám n Galatoomi Danke schön Kiitos Go raubh maith agat Amesegnallehu Thank you Shukran 謝謝 shukriya 感 Asante Sana Gracias Arigatoo
